Puppy Package Agreement

Congratulations on the new addition to your family. Getting your new puppy off to a good start in life is very important to the overall well-being of your pet. The Puppy Package offers your puppy a great foundation to a healthy long life. In addition to the Puppy Package, your puppy needs monthly heartworm and flea preventions to protect from deadly parasite infections. Heartworm disease can cause permanent damage to the heart and can be fatal. Heartworm prevention also protects you puppy from intestinal parasites which can potentially harm your family. Fleas can carry parasites like tapeworms and can be a great nuisance to you and your pet, therefore it is very important to keep your puppy on flea prevention.

Please read and initial the following

_____ Puppy Package visits are scheduled approximately 4 weeks apart, however after 6 weeks without being seen, the Puppy Package can be canceled with no refunds.

_____ If for some reason you can no longer keep your puppy, the Puppy Package can be transferred to the new owner for a \$30 fee to be paid by the new owner. You will need to come in to fill out a release of ownership form in that case.

_____ If there are any other medical problems that need to be addressed at the puppy package visits there will be fees for those services and medications.

_____ If you have more than 1 missed appointment the puppy package can be canceled with no refunds.

_____ It is your responsibility to bring a fecal sample to your appointments. If you fail to do so, Shelbyville Rd. Vet Hospital can not be held responsible for any intestinal parasite problems that may occur.

_____ You must purchase the recommended Heartworm and Flea preventions at the 2nd and 3rd visits. On the 1st visit, the preventative is complimentary, if the puppy is less than 22 lbs. If you decline the prevention, the price of the puppy package will revert back to the original price.

_____ **No refunds will be given for the puppy package for any reason.**

Thank you,
Shelbyville Road Veterinary Hospital
