DHLPPC- Distemper, Hepatitis, Leptospirosis, Parvovirus, Parainfluenza, Coronavirus,
Puppies should be given 3-4 boosters of this vaccination.

Bordetella- Commonly known as “Kennel Cough.” This is a highly contagious bacterial infection that causes a persistent cough that can lead to pneumonia.

Strongid- Oral medication given to remove roundworms and hookworms.

Fecal- Stool sample examination for intestinal parasites. This is a very important test as many parasites can infect humans as well causing serious problems.
